

Dear Parents,

Music fuels our minds and our creativity. Enhancing your child's life with music helps all aspects of learning. Music is a highly effective means of communicating information and is a useful tool in teaching basic concepts, such as counting, colors, social skills, etc.

Music has always been an important focus of our curriculum here at Christ the King Daycare / Pre-School. Children have always enjoyed activities in our music specialty room as well as daily activities in their class. They especially enjoy the Edu Music program and we are delighted to inform you that the Edu Music program is back this year.

Mr. Kenny, our Edu Music teacher, will be at our Center on Tuesdays and Thursdays beginning 10/5/21. The Edu Music program model is based on a developmental approach to music education, rather than a performance-oriented approach. It builds on the understanding that a great deal of development needs to take place before participants are able to "speak" the language of music and competently express themselves by singing and moving. Using a fun and participatory curriculum, children develop life skills through tonality and rhythm exercises, singing, and movement focused on motor skill exercises.

We are so excited to continue working with Edu Music again to introduce additional music styles and learning experiences to our children.

Thank you,

Janine Michel  
Executive Director
